

digital storytelling

Digital Storytelling Notes - summary

digital stories are

- short 2 - 5 minute 'movies' using
 - soundtrack with voice of the storyteller
 - digital still images with transitions linked to the soundtrack and often supported by
 - scanned documents & other images
 - recorded environmental sound
 - music
 - video clips
- they are usually personal stories - about something that happened in the storyteller's life
- sometimes they are about something that happened to someone else (or about a community) but through the eyes and feelings of the storyteller
